

# Life in Hawaii Teacher's Guide

## Description

Students explore a Minecraft version of the island Oahu. The size of the island is much smaller than the real place, which allows players to quickly move from one famous point to the next. We have provided land and aerial vehicles to help with this. The only city on the island is Honolulu, due to its rich history, and it being the centerpiece for Hawaiian islands as we know them today.

## Learning Objectives

- Learn 25 facts about Honolulu, Oahu, and the state of Hawaii!
- Take a quiz to test your knowledge.
- Use in-game vehicles to explore famous points of interest like Waikiki Beach.

## Teacher's Notes

The game can be played with one child per game, but we recommend breaking up in groups of about 5 or 6 players per game.

## Guiding Ideas

Learn about Hawaii through an interactive virtual experience.

There are 25 points of interest to learn along the way and an in-game quiz to test the students' knowledge as they explore.

## Student Activities

- Race from the beginning of the quiz loop to the end using the in-game vehicles.
- Mine using the special drivable drill vehicle.
- Host a race around the island with the Formula 1 cars.
- Feel what it's like to hike the Konahuanui Mountain Range on its trails.
- Grow the island of Oahu by using lava to make a mountain erupt.

## Performance Expectations

Students will explore Oahu Island learning 25 facts about Hawaii along the way.
